Experience

Lost and Found Forum 11/23

- Also known as Hound, this project with two other classmates hoped to provide a solution to RPI's lackluster lost and found system. This web application unified disparate systems and provided an accessible and functional platform for managing lost and found items. This project focused on utilization of databases through PHP and SQL, and Git and Github for revision control and team collaboration

Portfolio Website 9/23

- Website to showcase projects and information about myself. Contains mini-projects that highlight my progress in both front-end and back-end development for the web. This project focused on teaching the fundamentals of web development from basic HTML and CSS to utilizing databases with PHP and dynamic page updates with JavaScript and JQuery
